

Time-Critical powered by Quick

Unprecedented speed and protection for high-tech shipments

Time-Critical powered by Quick

A premium logistics solution that provides complete reliability and end-to-end support for your time critical semiconductor and high-tech shipments.

As Quick-ly as possible

Just a few minutes of delay in the transport of semiconductor and high-tech shipments can disrupt your supply chain and ultimately affect your ability to reach your customers as planned. Time is of essence for such deliveries – which is why we provide a round-the-clock service, including out-of-hours operation and 24/7/365 access to our customer support teams.

Transparency and visibility

Our advanced digital tools provide you with 360-degree visibility and control. Access all your time-critical logistics information from a single platform – including shipment arrival times and location. Our teams also proactively inform you about the status of your shipment at each important step in the journey. By receiving accurate and timely information, you can be assured that your shipments are managed efficiently.

Contingency planning

Our team constantly monitors airline alerts, weather and global events that may impact your deadlines, and executes contingency plans as needed to ensure that the shipments arrive at their destination safely and on time.

Completely customisable

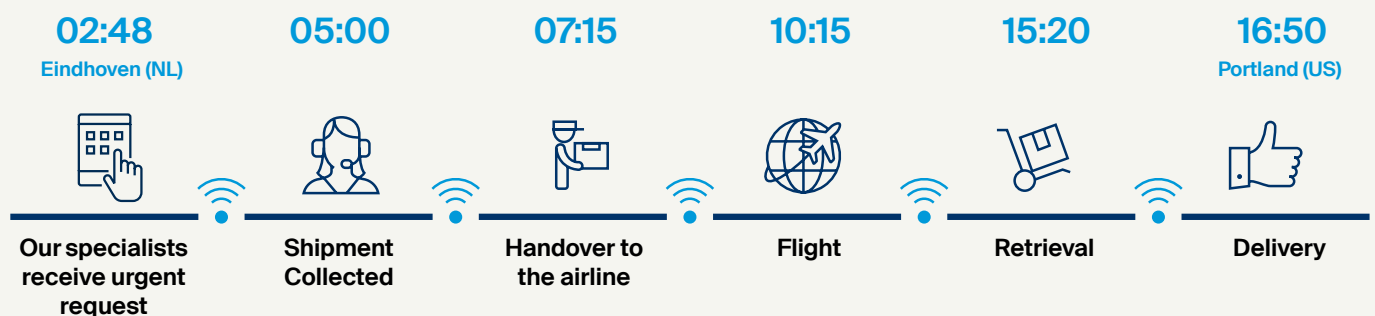

We build a solution that is tailored to fit the needs of your specific shipment, instead of relying on a standardised “one-size-fits-all” approach.

**When every moment counts,
you can count on us.**
